RE: Biennial Hazardous Waste Report

Dear Ms. Flournoy:

As requested, enclosed is the completed Generator Biennial Hazardous Waste Report for the year ending December 31, 1985.

James Q. Jenser

Environmental Coordinator

GENERATOR BIENNIAL HAZARDOUS WASTE REPORT FOR 1985

This report is for the calendar year ending December 31, 1985 Read All Instructions Carefully Before Making Any Entries on Form

I. NON-REGULATED STATUS

Complete this section only if you did not generate regulated quantities of hazardous waste at any time during the 1985 calendar year. Circle the <u>one</u> code at right that best describes your status during the entire year (see instructions for explanation of codes).

- Non-handler
- 2 Small Quantity Generator
- Exempt
- 5 Beneficial Use
- Out of Business

This Installation's Non-Regulated Status is Expected to Apply:
II. GENERATOR'S EPA I.D. NUMBER For 1985 Only Permanently

XVI. WASTE MINIMIZATION (narrative description)

- I. Projects Completed:
 - A) Removal of silver from the silver rinse water.
 - 1) Silver removed by electro plating.
 - 2) Silver removed by Ion exchange.
 - 3) Analysis show our silver content at .04ppm in the discharge water and 18ppm in the sludge.
- II. Projects In Progress:
 - A) Wastesaver unit (Evaporator Unit)
 - Was a capital purchase in 1985.
 - 2) Unit was installed in late 1985.
 - 3) We have trained personnel how to operate the unit in January 1986.
 - 4) Unit went into complete operations on February 10, 1986.
 - 5) Wastesaver makes the nickel plating line a closed loop system.
 - a) Removes nickel from waste treatment by having the nickel rinse go to the unit.
 - b) The sludge will have less nickel in it due to the reduction of nickel to treat.
 - c) The amount of sludge is reduced by not having nickel to treat.
 - 6) Results
 - a) We estimate a 1/3 reduction in the sludge due to using the unit on the nickel line.
 - b) The toxicity of the sludge will be reduced due to the reduction of nickel. Results will be seen by doing analysis of the sludge in 1986-87.
- III. Projects Planned
 - A) Investigate method to increase hold times over the baths to reduce drag out.
 - B) Investigate less toxic plating baths and cleaners.
 - 1) Non-cyanide silver plating bath.
 - 2) Low-cyanide silver plating bath
 - 3) Acid salts
 - 4) Less toxic soaps
 - C) Investigate equipment to make other plating lines a closed loop system.
 - 1) Evaporator units for silver and zinc plating lines.
 - 2) Filter systems.
- 4) Ion exchange
- 3) Reverse Osmosis
- D) Investigate the elimination of or the reduction in processes that generate hazardous waste.
 - 1) Silver strip operation
 - 2) Paint operation
 - Vapor degreasing
